Methodology

- Conducted October 28–November 3, 2026
- 800 self-identified Jews who voted in the 2026 election, including voters who cast their vote on Election Day and before Election Day
  - Margin of error: +/-3.5 percentage points at the 95 percent confidence level
- Survey sample drawn from a national voter file, consisting of all registered voters in the United States
  - Respondents with a likelihood of being Jewish, based on their first or last name or their geography, were contacted by text, and then took the survey on a secure link on their phone or computer if they identified themselves as Jewish
  - All respondents were asked at the beginning of the survey whether they consider themselves Jewish, using the same question wording as the 2020 Pew Research Center study, “Jewish Americans in 2020”
