

We want to sincerely thank Senators Ossoff and Warnock for their continuous unwavering support of a strong US-Israel relationship.

Their vote, on the joint resolutions of disapproval on sales of specific offensive weapons to the Netanyahu government, sent a strong symbolic message representing a growing portion of the American Jewish community that believes that the US-Israel relationship should be grounded in our laws, national security interests and shared values.

The Senators are true friends of Israel that have consistently voted in favor of American security assistance to Israel - playing an instrumental role in delivering over \$13 billion this year alone - including critical supplemental assistance after October 7th. They have repeatedly stood by Israel in its right to defend itself against the real security threats that the country continues to face.

This was *not* a vote to delay or cut aid to Israel and did not pertain to US support for Israel's defensive capabilities.

We are disappointed by those that seek to cast this vote as anything but a message of concern for the future of Israel, and for regional stability, security and peace.

Their vote of disapproval was one of true allyship and we thank them for their courage.

***The current signatories below represent a broad swath of our Metro Atlanta Jewish Community - including clergy, Jewish professionals, board members, and lay leaders in synagogues, camps, nonprofit organizations and beyond.***
